

Intro to Analytics Live Assessment

SECTION:1

1.

A: a – FALSE
 b – TRUE
 c – FALSE

2.

A: D

3.

A: D

SECTION 2:

1.

- Monthly average has a greater number of orders per month, less average order value and more percentage of orders delivered on time with respect to December 2021
- From the given data we can say that the order value may be high or less number of orders may be placed or due to late delivery order may be cancelled so order value has decreased
- The cost of the order may increase, less orders with high cost may increase the average order value
- May be the cost of the product has increased so less orders may place leads to decrease in December month orders delivered on time
